Greg Flaherty
Cummings Properties
200 West Cummings Park
Woburn, Massachusetts 01801

Dear Mr. Flaherty,

Enclosed please find two bronze ENERGY STAR Homes plaques for display in the residences at 370 and 420 Hemenway in Marlborough. The plaques will help to represent, to the residents as well as the general public, the accomplishment of the Cummings organization in meeting the high performance standards of the ENERGY STAR Homes Program.

Along with these plaques, I wish to convey my congratulations. Cummings Properties has been an exemplary participant in the ENERGY STAR Homes Program. All of the construction, project management and design personnel, whom Conservation Services Group (CSG) encountered on these two projects, exhibited support for the goals of the program and were receptive to our involvement. The project teams showed an eagerness to increase their knowledge of building science principles and high performance building strategies. We also learned from the ingenuity demonstrated by construction personnel who implemented various performance improvements.

I know that I speak for the whole of CSG when I say that I would welcome the opportunity to work with Cummings Properties again.

Sincere regards,

Ken Neuhauser
Technical Development Manager
Residential Conservation Division
Conservation Services Group, Inc.
